**Product number:** F07.030400.060130

## Description

- Diamond blade for full-depth cutting of all common types of quartzite
- DIAREX by König 3 Series – coarse diamond grit provides aggressive cutting action and high cutting speeds
- Designed for maximum feed rates and high production output – suitable for all types of bridge saws
- Thanks to the optimized number of segments, each diamond segment is positioned on an individual tooth, reducing cutting resistance and enabling smoother, more efficient cutting
- Diamond segments with precisely positioned diamonds ensure consistent cutting quality and performance throughout the stone. The perfectly arranged diamond layers within each segment ensure that fresh diamond cutting points are continuously and evenly exposed across all sides of the segment
